

ROADMAP FROM FIELDS TO GLUTEN-FREE OATS

Locally grown oats

Oats from trusted farmers

Our oats come from our own contract farmers which means we know the farmers and the growing conditions.

Traceability and transparency

The supply chain is as short and transparent as possible.

Top quality

Finnish oat grains are dried after harvest at the farmer's facilities, which ensures top quality.

Incoming loads classified

We classify and separate every load of oats with strict intake criteria regarding different foreign grains.

State-of-art technology for purity

The oat grains are purified from any foreign grains and other impurities in several different purifications phases.

Mechanical and optical processes

We have several purification phases in our process to ensure purity of the oats.

Top quality mill

Highly automated carbon neutral mill ensures best possible product safety and quality.

Multi-phased rigorous analyses

Throughout the process including check-points and quarantines. Each batch of end products are analysed and released only after the results indicate purity.

Certificates

- BRC
- AOECs
- Organic
- Halal
- Kosher

Supervised by accredited laboratory

We constantly compare our analysis results with the results from external accredited laboratory.

Continuous development

We continuously analyse and improve our process to achieve better and better quality.

Secure and safe supply
